

Course name: 215 “Research Project” [3 ECTS]

Manager: Axel Buendia, PAST Lecturer at Cnam CEDRIC

Description: This course must give students their first experience of putting the scientific and research lessons learned during semesters 1 and 2 into practice.

Prerequisites: Courses 101, 102 or 103, 104, 105, 106, 107, 108, 109,
(202 and 203) or (204 and 205) or (206 and 207) or (208 and 209) or (210
and 211) or (212 and 213)

Learning: Putting the knowledge and skills acquired into practice with a view to creating either:

- a scientific study of a technical or research issue
- the production of professional work in a traineeship or personal project

This work facilitates acquisition of the specific professional and scientific working methods studied during previous courses.

Assessment methods:

- First session: a report detailing the problem dealt with, the associated bibliography and the work carried out.
- Second session: same as above.
